

## INSTRUCTIONS FOR SCHEDULES P 5, P 6 AND P 7

### REPORTING FORMS FOR CABLE TELEVISION COMPANIES

#### SCHEDULES P 5 AND P 6

Report the system megahertz, the total number of channels the system is capable of distributing based on cable size, and the number of channels in place or use. If the equipment is in place, but not in use, add statement of explanation on attached supplemental page.

**Plant and Electronics:** List for each year the number of miles of underground cable and overhead cable installed and the total miles installed from the original time the system was built. If additional space is needed, attach an additional supplemental list similar to this form. The total underground and overhead miles of cable is required immediately below. State the number of trunk miles of cable that the system has and the number of feeder cable miles.

**Tower:** Report each and every tower in place, the year installed, its height in feet, and whether it is guyed. If the tower is unusual or the owner/taxpayer wishes to supply additional information, attach a supplemental page. The tower height is not to include the antenna.

**Satellite Dish(es):** Report each satellite dish present on the system in this taxing district and system. The size should be stated by meters and the year installed.

**Additions to Plant:** This section calls for the number of miles of new plant and electronics added during the prior year, showing the breakdown between underground and overhead miles of cable added.

**Plant Rebuilding or Upgrading:** Report the number of miles of plant rebuilt during the prior year, showing also the number of miles of underground and overhead cable rebuilt or upgraded.

**Other Information:** All costs or values data to be current replacement cost or value new as of December 31 of the year for which the report is required or requested. The number of customer converters to two parts; one figure is to represent those converters in use by the subscribers which are owned, leased or managed by the cable company; the second figure is to represent those converters in stock and not currently distributed as of December 31. Enter the current replacement cost or value new for all monitoring, testing equipment, office furniture and equipment, studio, props and camera equipment on the appropriate lines.

**Services Available:** Describe basic service, the number of subscribers and the fee for this service. Describe expanded basic service, if offered, the number of subscribers and the fee for this service. List and furnish all information on each and every pay channel, the number of subscribers and the fee for each as well as any other type of service offered. Report the annual gross income for these channels for the prior year.

**List Total Capital Expenditures or Major Improvement Cost for Year:** The cost items should be listed and date project started and date completed should be stated, as well as installed cost reported as of December 31 for the year of this report.

#### SCHEDULE P 7

Report the installed original cost for the items of the system listed. The cost is to be by year installed and unadjusted for any items removed or replaced.
