## **GUIDELINES FOR COST OF PRODUCTION—SCHEDULE 1**

The following guidelines are to be used as an aid in computing the average per gallon costs for producing distilled spirits. This computation should be made utilizing costs incurred for the entire year. Be sure to include costs associated with the drier house, since a dried grain credit is given.

### **Grain**

Include all grain costs associated with the production process.

### **Labor**

Include all labor costs associated with the production process. All direct, indirect and maintenance labor as well as the associated fringe benefits and payroll costs should be included.

### **Overhead**

Include depreciation, insurance and all other overhead costs related to the production process.

### **Other**

Include utilities, maintenance, quality control and any other expenses not previously accounted for which are a cost of production.

### **Dried Grain Credit**

For the item being produced, include total credit for dried grain or liquid feed.
