FINAL RULING NO. 2016-33
September 28, 2016

Unmined Coal Ad Valorem Tax Assessment
For January 1, 2015

FINAL RULING

The Kentucky Department of Revenue ("DOR") currently has outstanding unmined coal ad valorem tax assessments issued to [REDACTED] ("the Taxpayer") totaling a value of \$ [REDACTED], which results in estimated tax of \$ [REDACTED] for the 2015 tax year. Below are the assessed values in question, which are made by the DOR pursuant to KRS 132.820:

County	Account Number/ Lessee or Owner (-L or -O)	Parcel ID	Lessee	DOR Value of Total Tract or Parcel	DOR Value or Assessment of Taxpayer's Interest
[REDACTED]	[REDACTED]	[REDACTED]		\$ [REDACTED]	\$ [REDACTED]
				Subtotal-	\$ [REDACTED]
[REDACTED]	[REDACTED]	[REDACTED]		\$ [REDACTED]	\$ [REDACTED]
				\$ [REDACTED]	\$ [REDACTED]
				Subtotal-	\$ [REDACTED]
[REDACTED]	[REDACTED]	[REDACTED]		\$ [REDACTED]	\$ [REDACTED]
				\$ [REDACTED]	\$ [REDACTED]

It is the DOR's position that the Taxpayer has not submitted persuasive evidence that would establish or indicate that the assessments referred to above do not represent the fair cash value of the unmined coal reserves in question as of the January 1, 2015 assessment date. The Taxpayer submitted documentation to support his arguments regarding his theory of how to recalculate the idle factor and the time portion of said factor. However, the Department does not agree with the methods he set forth, nor does it find this documentation to be persuasive.

Unmined coal reserves are assessed by the DOR pursuant to KRS 132.820(1), which states, in part:

The department shall value and assess unmined coal, oil, and gas reserves, and any other mineral or energy resources which are owned, leased, or otherwise controlled separately from the surface real property at no more than fair market value in place, considering all relevant circumstances...

Ky. Const. § 172 states in part:

All property, not exempted from taxation by this Constitution, shall be assessed for taxation at its fair cash value, estimated at the price it would bring at a fair voluntary sale...

The DOR uses a three year average of actual sales price from severance tax returns, and the median of royalties from the preceding five years reported on unmined coal tax returns. This calculation system is designed to prevent the fair cash value of the unmined coal reserves as of the applicable assessment date from being unduly influenced by price spikes and drops from year to year. As the prices drop, so too do the factors used by the DOR. Because the assessment date is January 1, 2015, the market swing downward during 2015 tax year (i.e., after the assessment date) will not be reflected for that year. However, any market decrease in 2015 will be reflected in the January 1, 2016 assessment, even if the market price for coal were to increase substantially during the year 2016 (i.e., after the assessment date for that year, or January 1, 2016).

Based on the information available to the DOR, the reserves that have been assessed consist of mineable and merchantable coal reserves that are subject to ad valorem taxation and have been properly assessed at fair cash value. There has been no persuasive documentation or information provided by the Taxpayer that establishes the Taxpayer's claim that the reserves in question will not be mined because the market for coal will never recover from its current decline.

DOR's position is that the disputed unmined coal property is mineable and merchantable and has been properly valued at the fair cash value as required by law and that its factors are correct. See KRS 132.820(1); Kentucky Constitution Section 172. The assessment in question is

presumed to be valid and it is the taxpayer's burden to prove otherwise. Revenue Cabinet v. Gillig, 957 S.W.2d 206 (Ky. 1997); Walter G. Hougland & Sons v. McCracken County Board of Supervisors, 306 Ky. 234, 206 S.W.2d 951 (1947). DOR's assessments are presumed to be correct. The Taxpayer has not met this burden in the case of the assessment in question. DOR recognizes that under current market conditions, the coal in this property is unlikely to be mined in the immediate future. However, this property has mineable coal that may be severed at some future date; thus, the property has been assessed in the category of idle coal, which is the lowest possible valuation method for this tax type.

Therefore, the unmined coal ad valorem tax assessments are correct.

This letter is the final ruling of the Kentucky Department of Revenue.
